This course will engage students as they examine major approaches in modern psychology. Students will gain insight into their own values, reaction patterns and interpersonal styles as important tools in understanding themselves and others. Psychological science has the potential to expand our minds and enlarge our hearts. By studying and applying its tools, ideas, and insights, we can supplement our intuition with critical thinking, restrain our judgments with compassion, and replace our illusions with understanding. This course will introduce psychology as a science, the many facets of psychology, and the format as well as challenges of the research process in psychology.

Why Study Psychology?

Many people begin their study of psychology without a clear definition or understanding of the subject. There are many parts that make up the whole discipline. Psychology provides tools to help us gain insight into our own behavior, as well as our relationships with others.

What to Expect?

As you begin your study of psychology, you will find that it is different from many of your other classes. This is because psychology is connected to both social sciences, such as history or economics- and the natural sciences- such as biology and chemistry. As a social science, psychology explores the influences of society on individual behavior and group relationships. As a natural science, psychology looks for biological explanations for human behavior. You will learn more about the social and biological aspects of human behavior as you draw from the course material to gain insights into your life and the lives of those around you.

How do Psychologists Think?

In your study of psychology, you will learn to think like a scientist. Scientists constantly question their own assumptions and look for alternative evidence and conclusions. Scientist-including psychologist-use the scientific method as a problem-solving tool. It teaches them to think critically by encouraging open-mindedness, and intellectual curiosity, and evaluation of reasons. Using the scientific method will help you think critically and be objective when applying principles to everyday issues, people, and problems.

Please remember:

We practice RESPECT during discussions. We all have differing opinions regarding topics in psychology, and it's fine for us to stop and have lively discussions. Some students find discussions of difficult topics *uncomfortable*. In any discussion, **civil discourse in the classroom is to be maintained**. You don't have to like, approve of, or agree with the opinions I or peers express in the classroom, but you do have to allow for those various viewpoints. I do not tolerate rudeness in the classroom from students. Similarly, if I say something that you find personally offensive, please do call me on it (politely) so I can learn from my mistakes.

2 semesters, 1 credit

Graduation Standards:

APPLICATIONS OF SOCIAL STUDIES PROCESSES, KNOWLEDGE AND SKILLS:

Collaboratively and Independently, research, present, and defend discipline based processes and knowledge from social sciences (MLR A1, CCSS)

CIVIC ENGAGEMENT:

Apply the attributes of a responsible and involved citizen to affect a real world issue based on a local need. (MLR, A2 + A3)

HISTORY:

Apply and demonstrate knowledge of major eras, enduring themes, turning points and historic influences to analyze the forces of continuity and change in the community, the state, the United States, and the world. (MLR E)

HUMAN DEVELOPMENT:

Apply core concepts from psychology and sociology to examine contemporary patterns of human behavior. Students will examine, use the behavioral sciences in relations to the ways people and groups organize themselves around common needs, beliefs and interests. (NCSS 4 & 5)

Unit 1 Introduction to Psychology

Summary Psychological science has the potential to expand our minds and enlarge our hearts. By studying and applying its tools, ideas, and insights, we can supplement our intuition with critical thinking, retain our judgments with compassion, and replace our illusions with understanding. This Unit begins by setting a foundation for Psychological Study; covering the evolution of Psychology as a science, the many facets of Psychology, the format & challenges of the research process in Psychology.

Performance Indicators Assessed in Unit Debate factors, both genetic and environmental, that contribute to individual development and identity. (SS HD B)

Develop compelling inquiry questions and conduct research on current social studies issues by applying appropriate methods & ethical reasoning skills, & using relevant tools, technologies & sources. (MLR A1, A2, A3)

Construct and present arguments both orally and in writing in which claims, counterclaims, reasoning skills & evidence demonstrate their relevance to each other & the overall arguments. (MLR A-1, E-J)

Unit 2 Biological Basis of Behavior

Summary In this unit students will look at human behavior from the biological perspective. Various components of the Brain are discussed, as well as the structure of the Neuron, Nervous System and Endocrine System.

Performance Indicators Assessed in Unit Debate Factors, both genetic and environmental, that contribute to individual development and identity. (SS HD B)

Collaboratively and Independently, research, present and defend discipline-based processes and knowledge from Social Sciences in authentic contexts. (MLR A1)

Unit 3 Personality	
Summary	<p>This unit explores personality-why people act the way they do in specific situations- and individuality. We will investigate the characteristics of psychological test and explore various types of psychological tests, including those that measure intelligence, achievement, abilities, interests, and personality. Next we will explore the theories of personality that have been developed by the different schools of psychology. Together we will use this knowledge and apply it to career exploration.</p> <p>The rationale for this lesson is to convey to students the complexity of personalities. The knowledge gained from this lesson will help students recognize how different behaviors link to personality. This knowledge will be useful in the future so they can be better prepared to interact with people in college, career, and community settings.</p>
Performance Indicators Assessed in Unit	<p>Human Development C: Understands factors of attraction, conflict, aggression and pro/ anti-social behaviors.</p> <p>Applications A: Develop compelling inquiry questions and conduct research on current social studies issues by applying appropriate methods</p>
Unit 4 Life Span	
Summary	<p>This unit explores human development from birth through old age. This unit will be broken down into three parts. Part one explains the physical, cognitive, social, and emotional development of infants. Part two describes the physical and sexual developments that occur during adolescence. Personal and social developments are also explored. Part three examines the psychological issues that arise in adulthood. This issues involved with dying and death are addressed.</p>
Performance Indicators Assessed in Unit	<p>Human Development A: Understands theories of how individual identity forms and changes across the life span including complexities of identity and development.</p> <p>Human Development B: Debate factors, both genetic and environmental, that contribute to individual development and identity.</p> <p>Human Development C: Discuss the nature of stereotyping, bias, altruism and conformity in societies, and their implications for personal, group and national relationships.</p>
Unit 5 Career Exploration	
Summary	<p>Students will utilize the results of interest inventories to determin an occupation choice they would like to use in planning a career path. Students will develop a career plan which will reflect the process of preparing for, obtaining, and maintaining employment in their occupational areas.</p>
Performance Indicators Assessed in Unit	<p>Applications A: Develop compelling inquiry questions and conduct research on current social studies issues by applying appropriate methods</p> <p>Human Development C: Discuss the nature of stereotyping, bias, altruism and conformity in societies, and their</p>

	implications for personal, group and national relationships.
Unit 6	Propaganda and the Psychology of Politics
Summary	Students are introduced to a variety of propaganda techniques in literature, war and mainstream media to delve into the clinical psychology behind political advertisements and elections.
Performance Indicators Assessed in Unit	<p>Discuss the nature of stereotyping, bias, altruism, & conformity in societies, and their implications for personal, group and national relationships. (SS HD C)</p> <p>Identify and critique diverse perspectives on societal issues, trends, and events and articulate priorities different groups or people hold in their perspectives. (SS HD, MLR E)</p> <p>Evaluate various explanations and authors' differing points of view on the same event or issue, citing specific textual evidence from primary & secondary sources to support analysis (CCSS WH1, WH4-6, WH10; A-2, E-J, CCSS SL 4-6)</p>
Unit 7	An Invitation to Sociology
Summary	In this unit, students will explore the basics of sociology. Sociology studies human social behavior. It assumes a group, rather than an individual, perspective. Sociologists look for the patterns in social relationships. Individuals can benefit by using their sociological imaginations to look at events in their personal lives. Sociology is a young science. It started with the writings of European scholars who helped to focus America's attention on social issues. After World War II, America took the lead in developing the field. Sociology includes three major theoretical perspectives. Functionalism views society as an integrated whole. Conflict theory looks at class, race, and gender struggles. Symbolic interactionism examines how group members use shared symbols as they interact. Students will use these theories while researching sociological problems in society.
Performance Indicators Assessed in Unit	<p>Human Development C: Discuss the nature of stereotyping, bias, altruism and conformity in societies, and their implications for personal, group and national relationships.</p> <p>Human Development E: Understand the development of norm, rituals, ethnocentrism, race, ethnicity and gender, including the adoption of the beliefs of dominant groups and protection of minority rights and beliefs.</p>
Unit 8	Stress, Coping and Well-Being
Summary	In this unit students will look at the psychological factors related to wellness and illness, including the prevention, diagnosis and treatment of medial problems.
Performance Indicators Assessed in Unit	<p>Examine the factors that shape mental health & how constructs change over time. (SS HD D)</p> <p>Apply an understanding of the forces of continuity and change to analyze the evolution of historical eras, the persistence of enduring themes, and the significance of turning points and current issues in Maine, Maine Native American cultures, the nation and the world. (MLR E1 b, E2 b)</p>

Unit 9 Defining Normal	
Summary	In this unit we will look at the four primary perspectives on psychological disorders defined by abnormal behavior. An overview of Anxiety, Mood and Personality Disorders along with various treatment approaches will be discussed.
Performance Indicators Assessed in Unit	<p>Examine the factors that shape mental health & how constructs change over time. (SS HD D)</p> <p>Apply an understanding of the forces of continuity and change to analyze the evolution of historical eras, the persistence of enduring themes, and the significance of turning points and current issues in Maine, Maine Native American cultures, the nation and the world. (MLR E1 b, E2 b)</p> <p>Understand theories of how individual identity forms and changes across the life span including complexities of identity and development. (SD HD A)</p>
Unit 11 Social Psychology	
Summary	In this unit we will look at how people's thoughts, feelings, and actions are affected by others. Special focus on stereotypes, the role of persuasion, conformity, prejudice, interpersonal attraction, aggression and prosocial behavior.
Performance Indicators Assessed in Unit	<p>Understand the development of norms, rituals, ethnocentrism, race, ethnicity and gender, including the adoption of beliefs of dominant groups and protection of minority rights and beliefs. (SD HD E)</p> <p>Understand theories of how individual identity forms and changes across the life span including complexities of identity and development. (SD HD A)</p> <p>Discuss the nature of stereotyping, bias, altruism, & conformity in societies, and their implications for personal, group and national relationships. (SS HD C)</p>
Unit 12 Social Inequality	
Summary	In this unit students will investigate patterns for social change and the origin of tensions that occur when the goals, values, and principles of two or more institutions or groups conflict.
Performance Indicators Assessed in Unit	<p>Understand the development of norms, rituals, ethnocentrism, race, ethnicity and gender, including the adoption of beliefs of dominant groups and protection of minority rights and beliefs. (SD HD E)</p> <p>Identify and critique diverse perspectives on societal issues, trends, events, and articulate priorities different groups pr people hold in their perspectives. (MLR E1 d, E2 a, CCSS RH 6)</p> <p>Develop compelling inquiry questions and conduct research on current social studies issues by applying appropriate methods and ethical reasoning skills, and using relevant tools, technologies and sources from social studies fields to conduct the inquiry. (MLR A1, CCSS WH 7-9)</p> <p>Discuss the nature of stereotyping, bias, altruism, & conformity in societies, and their implications for personal, group and national relationships. (SS HD C)</p>
